

1993 May 18

Dear Users Group,

This document details the expectations a Registered Users Group (RUG) can have of INOVAtronics, and also the expectations INOVAtronics has of a RUG.

RUG expectations of INOVAtronics:

INOVAtronics will send press releases as they become available.

INOVAtronics will send 10-20 copies of each new piece of literature that is produced.

INOVAtronics will send each new demo disk that is released for general distribution.

INOVAtronics will send a note describing the shows we will be attending over the coming quarter.

INOVAtronics expectations of RUG:

RUG should place us on the mailing list to receive all RUG mailings and newsletters.

RUG should notify us, preferably in writing via FAX or mail, of any address changes and associated personnel changes (Example: New UG President elected)

RUG should forward to us any letters and/or suggestions regarding our products or policies as often as is possible. Every 3-4 months would be great.

RUG should notify us, preferably in writing, of any advertising rate changes.

Thank you very much for your time and interest. Please don't hesitate to call or write if you have any questions or problems.

Sincerely,

Jim O'Flaherty, Jr.
Director Of Sales

PS. We are very interested in giving you a free copy of each of our products as they are released. Each time we release a product or upgrade, we will trade it for:

A full page advertisement in your newsletter.

A review, good or bad, of the product published in your newsletter.

This trade benefits you because we send you a full retail unit to do with as you like. We benefit because INOVAtronics gets company and product recognition which help us sell our products.

There are minimum requirements to be met by your group to qualify for the free software. The primary requirement is that your group publish a newsletter monthly.

1993 May 18

Dear Users Group,

Thank you for your interest in INOVAtronics. As the makers of CanDo and Directory Opus, we want to communicate with your Users Group on a more direct basis. There are benefits to be derived from this relationship both for your Users Group and INOVAtronics.

Benefits to your Users Group:

You will receive a wealth of information from us, on a monthly basis, informing you of the latest Amiga product releases. If you provide us with a FAX number when you fill out and return the enclosed "Users Group Profile" form, we will FAX you on the more important updates (Ex: product upgrades, new releases, etc.) as they occur.

Occasionally we will extend a limited time special offer to your members.

We will send, to your Users Group, samples and demos of our products in trade for provision of advertising and review.

Benefits to INOVAtronics:

Since you will be right up to the moment on our products, we will sell more of them, allowing us to focus on what we like most: creating more GREAT Amiga products.

Since we are in constant communication with you, any suggestions, bug discoveries or product alteration requests you make will be used to give you what you want and deserve in the products we create and maintain. It is preferable that suggestions be mailed or FAXed to us in written form.

Please fill out and return the "User Group Profile" form enclosed so we can get you on our Registered Users Group list. The faster you are placed on this list, the quicker you will begin receiving information and communication from us. By the way, if you have a couple of moments, you can call me on the phone at (800) 845-8499 or (214) 340-4991 and I can enter your Users Group information right over the phone. You can also FAX the completed form to (214) 340-8514.

I look forward to working with your Users Group. We have lots of new products approaching release so you can look forward to more exciting times with INOVAtronics.

Sincerely,

Jim O'Flaherty, Jr.
Director Of Sales

Go ahead, Make your own software!

CanDo combines an extensive point-and-click interface with an incredibly powerful BASIC-like scripting language. A lot can be done without writing a single line of code. However, when scripting is required, we give you lots of help there, too, with our exclusive script editor and editor tools. See below.

CanDo's Script Editor

Examples of CanDo's Editor Tools:

Sound

Brush Anim Movement

AREXX

Inside every Amiga user there is a software author trying to get out.
CanDo is the answer! Start 'Do'ing it your way today!

INOVAtronicS

Dallas, Tx USA 75231-2499
214-340-4991 FAX 214-340-8514

Be More Productive.

Do it with CanDo!

From Jaded Programmers to Ambitious Neophytes:
Everybody's 'Doing It!

The Idea Is All Yours

Got an idea for a software project?
A utility that you need but can't find anywhere? A game you'd like to have, but simply doesn't exist? Or anything at all you might want or need? Now, virtually anyone can create their own complete, working software with just a fraction of the time and effort involved in traditional high (or low!) level language development.

Prime Features

- Creates Standalone Programs
- Online Help for all features
- Free expert technical support
- AmigaDOS 2.0 compatible
- AREXX Support
- Full Parallel and Serial Port support
- CanDo programs (called 'decks' because they are made up of 'cards') can include all of the following:

menus, multiple full screen and brush animations, IFF pictures, 8svx sounds, window and button border styles, gameport, prop gadgets

- and the list goes on and on...

Learning Curve Goes Flatline

CanDo may be the most capable, easiest to learn software authoring system ever on any platform. It serves as the conduit between your imagination and your Amiga!

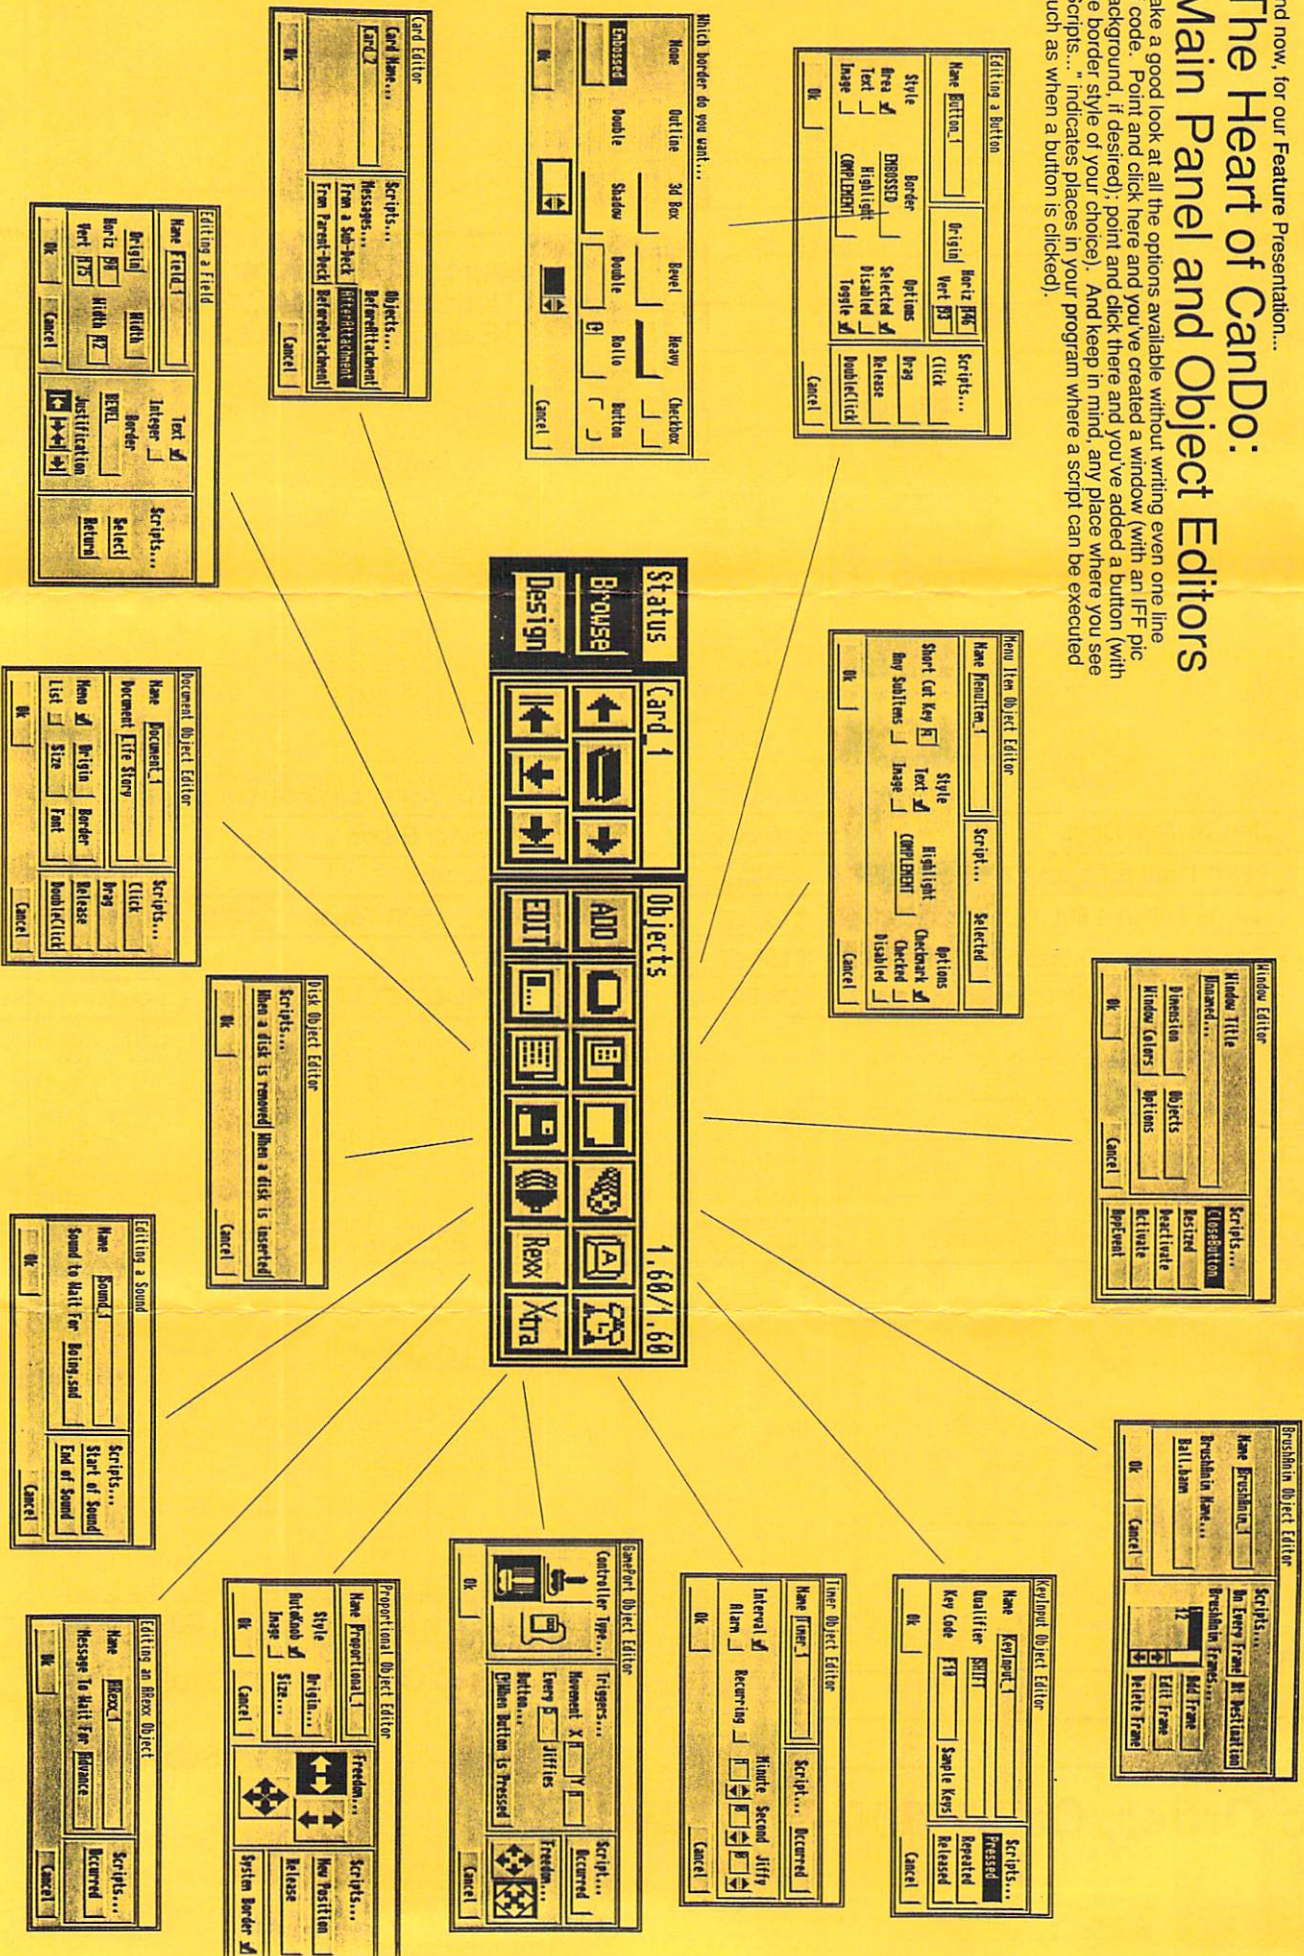

INOVAtronicS

And now, for our Feature Presentation...

The Heart of CanDo:

Main Panel and Object Editors

Take a good look at all the options available without writing even one line of code. Point and click here and you've created a window (with an IFF pic background, if desired), point and click there and you've added a button (with the border style of your choice). And keep in mind, any place where you see "Scripts..." indicates places in your program where a script can be executed (such as when a button is clicked).

Quality Products from INOVAtronics

CanDo and Company

CanDo v2.0 - CanDo, the most powerful interactive general purpose applications authoring system available, allows any Amiga user to create standalone software applications that take advantage of virtually all of the Amiga's outstanding capabilities. \$199.95. AmigaDOS 2.0/A3000 compatible. New in version 2.0 : 400+ page manual, Script Bookmarking, Object Layer Tool, DOS Notify Object, plus Database Functions, Multiple Screens and Windows, Floating Point Math, and MUCH more! Upgrades available. Join the CanDo Auto Upgrade Club and get upgrades automatically as they are released. Call or write for more info.

BBS Decks Disks - Clever CanDo users are always creating great decks with CanDo and uploading them to the Public Domain Decks section of our Tech Support BBS. We collect the most useful and innovative of them, put them on a disk, and sell them for a song. Now available: Vols. 0, 1, 2, 3, 4, 5 & 6. \$5.00 ea. These are available as part of the CanDo Auto Upgrade Club.

The CanDo Test Drive - Try it before you buy it! Call or write for details. \$10.00 (and if you buy CanDo, either from us or your favorite participating dealer, we'll give you the ten bucks back via coupon)

CanDo T-Shirt - Show your true colors in this great looking 100% cotton heavy-duty tee! Yellow with red thumbs-up symbol with "CanDo!" in large letters on front; Blue and white 'CanDo Power Steering for the Amiga' logo on back. S, M, L, XL, XXL. \$16.95. Be the first kid on your block!

The Ultimate CanDo Works - Take CanDo 2.0, CanDo Buttons, a CanDo T-Shirt and BBS Decks disks 1-4 and you've got the ultimate CanDo deal for just \$229.95. Don't forget to specify shirt size when taking advantage of this great offer.

The CanDo Newsletter - At last, a publication dedicated to our favorite application authoring system! This quarterly letter will deal primarily with current aspects of CanDo such as features of new versions, tech support issues, availability of new CanDo products (BBS Disks etc.), and more. Published by Desktop Utilities, leading Australian Amiga distributor. \$15.00/year (four issues).

CanDo Buttons - Formerly Interface Design Kit; two disks of professionally created button and icon art for custom interface screens. Included are button designs for video, sound, music, anims, video disc, printer, mouse, disk and many more, as well as several types of arrows and generic buttons. Great for use with CanDo! \$29.95.

General Utilities

Directory Opus - Opus is a state-of-the-art dir util that does a lot more than just copy files and format disks: shows pictures, fonts, brushes and anims, plays sound and SoundTracker files, launches executables and CanDo decks, is highly configurable and has on-line help for all features. By Jonathan Potter. \$99.95. Opus Auto Upgrade Club available. Upgrade from v3.4x to v4.0 for \$40.00 + s/h. Upgrade from versions prior to v3.4: \$50.00 + s/h

Opus T-Shirt - Another eye catching great looking 100% cotton heavy-duty tee! Please specify size - S, M, L, XL, XXL. \$16.95. Become an Opus aficionado!

Turbo Print - A full-featured printing system that powers-up your "stock Chevy" dot matrix printer, resulting in output of "Ferrari-like" quality. Includes variable color correction, multiple dithering and smoothing methods, poster mode and much more. Extremely comprehensive and configurable - works with all Amiga software. \$129.95

GigaMem - Virtual memory enhancement system allows your Amiga to utilize its unused hard drive space as RAM with no additional hardware. Run RAM-hungry programs such as Art Department, Deluxe Paint, and AudioMaster without running out of memory. GigaMem works on all Amiga 020/030 based computers with MMUs operating under Kickstart version 2.04 or higher. \$149.95

Tools for Power Programming

MetaScope v1.5 - The leading programmer's debugger for the Amiga for five years running is now part of the INOVAtronics Power Tools line. Multi-window, trace, break point, assemble-to-memory, more. \$99.95. Upgrade available to owners of previous versions: \$25.00 + shipping. MetaScope Auto Upgrade Club available.

Hardware

New! The HiQ A500 Tower - The most exciting new piece of Amiga hardware to be introduced since the Amiga 500 itself, the HiQ A500 Tower is the answer to every A500 owners dreams (dreams of power, that is). Providing a case for the A500 motherboard and a separate, detachable case for the A500 keyboard, the Tower provides slots for four A2000 compatible cards, including a fully-Toaster compatible video slot and two BridgeCard compatible slots. Also included are up to ten drive bays and a co-processor slot. Makes any Amiga 500 an Amiga powerhouse. \$699.95.

INOVAgames Entertainment

New! Vektor Storm - A fast-action, multi-level arcade-style game with superior graphics and stereophonic sound. Check your blood pressure, charge up your laser cannon and prepare for the fight of your life. By Carl Moore. \$39.95
